

# Process Development Analytical Sciences

- Complete test method and instrumentation development
- Wide portfolio of test methods
- SHL-built testing platform
- Characterization testing for assembled combination devices and sub-assemblies
- FDA approved facility
- ISO 13485:2003 and EN ISO 13485:2012 certifications

Dedicated analytical science laboratory

Characterization of product to meet specifications and relevant regulations

Stability studies on final assembled combination devices and subassemblies

Exceptional laboratory staff focused on SHL designed products

## List of Services

1. Syringe Characterization
2. Feasibility Testing
3. Design Assessment
4. Design Verification
5. Aging Studies
6. Transportation Studies
7. Stability
8. Investigation
9. Test Equipment Specification
10. Test Method Development Process
11. Test Method Validation
12. Test Method Transfer
